TITLE	Pennsylvania College of Technology Sourcebook, 1993-1994.
INSTITUTION	Pennsylvania Coll. of Technology, Williamsport.
PUB DATE	May 94
NOTE	307p.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC13 Plus Postage.
DESCRIPTORS	College Planning; Community Colleges; *Enrollment; Enrollment Trends; Females; Governance; *Institutional Characteristics; Males; Statistical Data; *Student Characteristics; Two Year Colleges; *Two Year College Students
IDENTIFIERS	*Pennsylvania College of Technology

ABSTRACT

This report provides a statistical profile of Pennsylvania College of Technology (Penn College) and its environment for 1993-94. The first two sections provide a profile and history of the college, organizational charts, and a description of the governance system. Section III provides tables on students, including numbers of applications, enrollments, and graduates; enrollments by age and sex, sex and attendance status, race and sex, and service area and county; student academic preparation, grades by division, and retention and graduation rates by division and program; student reasons for enrolling and leaving Pen College; occupations with the fastest growing jobs; and continuing education enrollments by program area and location. Section IV describes 14 competing institutions in Penn College's service area, including enrollments, tuition, and fees, while section V presents data on the potential student pool, including high school graduates, completion rates, and college and Penn College entrance rates by county and school district. Section VI focuses on Penn College personnel, including full- and part-time staff by occupational activity, racial/ethnic background, and sex; average full-time salaries by employee group and academic status; and faculty distribution by division and academic rank. Finally, section VII provides campus maps and descriptions of facilities, square footage, and classroom and lab space, while section VIII presents tables on such financial areas as average cost per full-time equivalent student by operating unit; tuition and fees; financial aid awarded; and grants, contracts, revenues, and expenditures. PREFACE

This is the Pennsylvania College of Technology Source Book. It offers a factual profile of Pennsylvania College of Technology (Penn College), and its environment. We hope that the information will be informative and useful to the constituents of Penn College as well as serving as an orientation to new faculty and staff and a resource to current ones. If more information is needed, please contact the Office of Strategic Planning and Research, or the source indicated at the bottom of each table.

Overview

Eight sections compose the Source Book. The first two sections describe Penn College in prose; the following six sections display statistical data regarding the College and its environment.

Section I introduces Penn College with an institutional profile and history. Section II includes organizational charts, and a description of the internal governance system.

Section III describes our students: Section III-A counts students as they flow through the College. Numbers of applicants, enrollees, and graduates are included. Readers may look at this section as a **systems approach** to Penn College: new student inputs, students in the system, and finished student outputs. Outputs include both graduates and transfers to other institutions. Also included are five year enrollment projections. Section III-B describes the demographic characteristics of our students, including age, gender and origin. Section III-C looks at the academic preparation that they bring to Penn College, and what sorts of grades they get here. Section III-D, "Attitudes, Motivations and Choices," draws upon a broad spectrum of survey research conducted by the College to determine why our students go to college, why they chose Penn College, and what their other options were. Section III-F looks specifically at enrollments within our continuing education area.

Section IV continues the systems approach by describing alternatives, or competitors to Penn College for students in our environment. A major alternative is other institutions: these are identified, and their enrollments and tuition and fees are included. Another competitor for our students is employment; thus employment rates are included in this section.

Section V looks at a crucial aspect of our environment: the pool of potential students. Included are data on numbers and rates of graduates from our most important feeder high schools. Also included are population counts for Williamsport, Lycoming County and all of Pennsylvania.

Sections VI, VII, and VIII describe the inputs of people, facilities and money that go into the education of Penn College students.

Section VI describes personnel, the people that work at Penn College, teaching and supporting students in the learning process. Identified are the areas where people work, their educational qualifications, demographic characteristics and salaries.

Section VII enumerates the buildings, real estate, laboratory and instructional facilities and equipment that provide the educational setting.

Section VIII, finally, delineates the College finances. Tuition, state appropriations, financial aid, and institutional balance sheet (revenues and expenditures) information are included.

External data have been collected and included directly within the Source Book. For example, included are extensive data regarding enrollments and graduation rates of "feeder" high schools which send students to Penn College (see Section V. "Potential Student Pool"); and data regarding demand for various occupations through the end of the decade (see Table III-E2, page 96, "Largest Job Growth").

Most statistical tables have integrated five years of historical data. This makes data much more meaningful and useful. Presentation of data in an historical format will enable the reader to perceive trends.

Laser printing and computer graphics software technology have been employed to make tables more readable, more "user-friendly," to the reader's eye, by varying print sizes and shadings. Although transparent to the reader, all data have been entered into Borland Quattro Pro spreadsheets, to facilitate analysis and updating.

The environmental/demographic data describing population by race, drawn from 1990 and 1980 U.S. census data, were retrieved on-line, and downloaded to an IBM personal computer via computer modem connection to the sophisticated mainframe computer at Penn State University at the University Park campus. These data were drawn from the Pennsylvania State Data Center (at Penn State-Harrisburg) EDIN data bases, which reside on the mainframe.

The graphs on the following pages highlight key trends for the five year period 1989-1993. "FTE Enrollments by Division" (page v) grew steadily over four years and levelled down in Fall 1993. The "Entering High School Rank" (page vi) shows that the proportion of students drawn from the lowest third of the class has been hovering around 22%, enrollments from the middle third climbed slowly, and proportions of students from the top third of the class dropped slowly since 1990. The graph on page vii displays "Enrollments by Race/Sex" for the same period, 1989-1993.

INTRODUCTION: GENERAL INFORMATION

PENNSYLVANIA COLLEGE OF TECHNOLOGY

INSTITUTIONAL PROFILE

TYPE: Public two-year college

AFFILIATION: Subsidiary affiliation with The Pennsylvania State University

ENROLLMENT: Fall 1993
- 4820 total
- 2685 men, 2135 women
- 3687 full-time, 1133 part-time

FACULTY(*): Fall 1993
- 304 total
- 206 full-time, 98 part-time

FINANCES: Total institutional operating budget for 1993/1994: $33,756,889

CAMPUS: The college is comprised of 898.62 acres and 20 buildings:

- Academic Center
- Advanced Technology and Health Sciences Center
- Automotive Trades Center
- Aviation Center
- Buildings Trades Center
- Campus Center
- Community Arts Center
- Diesel Center
- Earth Sciences Center
- General Services
- Gymnasium
- Learning Resources Center
- Lifelong Education Center
- Metal Trades Center
- Morgan Valley Retreat Center
- North Campus
- Professional Development Center
- Sawmill
- Susquehanna River Site
- Technical Trades Center

(*) Faculty data are as of 10/15/93 payroll, and does not include counselors, librarians, or temporary faculty.

DEGREES GRANTED:

- Bachelor of Science (BS)
- Associate of Applied Arts (AAA)
- Associate of Applied Science (AAS)
- Associate of Arts (AA)

CERTIFICATES GRANTED:

- Computer Operations Technology
- Office Assistant
- Computer-Aided Drafting
- Construction Carpentry
- Electrical Occupations
- Plumbing
- Culinary Arts
- Practical Nursing
- Surgical Technology
- Machinist General
- Welding
- Auto Body Technician
- Automotive Service Technician
- Aviation Maintenance Technician
- Diesel Technician
- Heavy Equipment Technician

DIVISIONS:

- Business and Computer Technologies
- Construction and Design Technologies
- Health Sciences
- Industrial and Engineering Technologies
- Integrated Studies
- Natural Resources Management/Transportation Technologies

INSTITUTIONAL HISTORY

ESTABLISHING A TRADITION IN THE REGION

The Williamsport area established a commitment to providing quality, vocational/technical education responsive to community and individual needs in the early 1900's. This training began in a small way at the time of the First World War as the Williamsport School District provided industrial art shops. The community was soon serviced by the expansion of the inaugural program to an evening adult program that emphasized vocational education. Enrollments quickly increased with the return of World War I veterans, including the disabled. The Depression Era of the 1930's witnessed additional growth in the local educational effort as retraining for the unemployed was provided in conjunction with New Deal programs. By this point the local community effort had attained national prominence for vocational/ technical education and was referred to as "The Williamsport Plan."

The second phase of the formative period was the timely establishment of the Williamsport Technical Institute in 1941. This development heightened the visibility of the vocational training opportunities and increased institutional flexibility. The almost immediate involvement of the nation in the Second World War and the rapid transition to the postwar industrial boom accelerated the expansion of the emphasis and merit of vocational training. Once again veterans and handicapped persons were significant clientele of the educational services provided locally. The strengths of the local community effort began to draw students from outside the region at the same time as the Williamsport area offered its vocational training for secondary students to regional school districts in 1945.

The educational programs in these formative times were locally controlled and funded. Resourcefulness of staff was a key to development and the procurement of instructional resources. As recognition of vocational training grew and the need for overall postsecondary education increased, an expanded mission followed societal shifts and the maturation of the industrial society, Pennsylvania joined the national trend toward two-year postsecondary institutions by the passage of the Community College Act of 1963.

SUMMARY OF SIGNIFICANT EVENTS IN ESTABLISHING THE REGIONAL TRADITION

DATE		EVENT
-1914-1919	-	Industrial Arts program inaugurated as part of the Williamsport School District
-1919	-	Training provided for disabled servicemen
-1920	-	Part-time vocational/technical education provided for Williamsport High School students
-1930's	-	Vocational programs provided under contract to unemployed as part of federal programming (CCC, WPA, etc.)
-1940's	-	Cooperation with Pennsylvania Rehabilitation for training programs
-1941	-	Creation of the Williamsport Technical Institute
-1944	-	Veterans' training begun even before the passage of G.I. Bill of Rights (Twenty-seven courses of study available including a joint program sponsored by WTI and local industry for the "Veteran Inventor.")
-1945	-	Watsontown High School becomes the first area district to utilize the WTI for secondary vocational education

TRANSITION TO A COMMUNITY COLLEGE

Local supporters of vocational education seized the opportunity for more extensive community and state support offered by the Community College Act of 1963. Discussions and negotiations ensued and by February, 1965, school districts had joined to create The Williamsport Area Community College. Local orientation was reflected in sizable Williamsport representation on the Board of Trustees with the seeds for a larger, regional emphasis reflected in the size of the formally designated service area which encompassed 10 counties and 7,207 square miles.

The transition was *much more than a name change*. A comprehensive community college mission backed by a greatly expanded support mechanism was established. Secondary, postsecondary, general education and community service programming were viable components of the new institution. The growth of the College began immediately witnessing the merits of the new mission and philosophy. Students, staff, and programs expanded in the late 1960's and early 1970's. Physical space needs to accommodate the growth were met through the acquisition of existing structures such as the facilities of the former Williamsport High School and adjacent industrial structures.

The growth of the College saw the number of sponsor districts increase to 20 by 1977. Students, attracted by the strong and diverse vocational emphasis, were drawn from across the state and the Northeast region of the nation. This spurt in numbers derived from a variety of factors such as the last vestiges of the baby boom, societal emphasis on training, the return of veterans from the Vietnam conflict, and societal role changes that spurred many adults, especially women, to return to education.

Secondary programs experienced substantial increases during the last years of the population boom. The increase in size reflected an accompanying broadening of interests and involvement. Board of Trustee membership was now representative of the regional support. Students came in substantial numbers from outside the areas established through sponsorship as well as the geographic delineation established in 1960.

In the early 1970's, temporary setbacks in enrollment forecasting were experienced as a result of a declining high school age population and the end of the Vietnam era. Assessment of the future of the institution was undertaken. Under new leadership and internal reorganization, the College began to take stock of its future. Administrative reorganization, instructional and student development, and plans for addressing major facilities problems resulted. Community education expanded its offerings and created effective marketing strategies to meet the societal attitudinal changes regarding retraining and leisure pursuits. Basic services in developmental studies, cooperative education, and career counseling were established or expanded. Some shifts in programs occurred in response to cyclical employment trends and developments in occupational and personal needs and opportunities.

The College celebrated its 20th year of service during school year 1984-85. But as the year began, the 20 school districts which sponsored the college actively sought a way out of their sponsorship arrangement. Significant efforts to secure a county sponsorship began in the early fall and continued through the late spring, with a facilitator from the Department of Education attempting to mediate a satisfactory resolution in June, 1985. As all of the efforts proved to be unsuccessful, the College faced a July 1 closing if no solution could be secured.

With the July 1 deadline just days away, the long-sought solution was found. On June 27, 1985, the City of Williamsport approved an offer of city sponsorship followed by the acceptance of the Colleges' Board of Trustees the next day. The Pennsylvania Department of Education approved the new sponsorship agreement on July 11, making official the first modified sponsorship arrangement within the State System of Community Colleges.

The working relationship between the College and its new sponsor, the City of Williamsport was positive from its beginning in 1985. However, good relations were realized in part because of the very conservative College request for funds from the City during each annual budget process. While highly supportive of College programs and opportunities and while contributing less than three percent (3%) to total College funding, the City announced in 1988 its desire to facilitate a broadened sponsorship base, so that it might exit from sponsorship obligations on or before June 1990. In light of the significant and growing impact of College programming and service throughout Pennsylvania, a new type of statewide sponsorship was sought by the College as the final and most appropriate solution to the long search for broadened sponsorship.

CONTINUING AND EXPANDING THE TRADITION WITH A NEW AFFILIATION

Expanding College activity during the late eighties in the area of technology transfer led to active working relationships with Penn State officials as the Consortium for Advanced Manufacturing Productivity was implemented and as one of the state's Industrial Resource Centers was jointly secured. From these partnership efforts, the College became aware of the commonality of purpose and interest that suggested significant benefits could result from permanent affiliated resources and operations.

On September 14, 1988, the Governor of Pennsylvania, the President of The Pennsylvania State University, and the President of The Williamsport Area Community College jointly announced a prospective affiliation between the two institutions in which The Williamsport Area Community College would become a subsidiary corporation of the Corporation for Penn State. During the remainder of 1988 and the first half of 1989, extensive efforts produced three documents which constitute the "affiliation agreement" between the two educational entities: 1) Articles of Incorporation and Bylaws, 2) Memorandum of Understanding, and 3) House Bill No. 1086. With the support of the state's chief executive officer and exceptional leadership by local legislators, the legislation creating Pennsylvania College of Technology as an affiliate of Penn State became law on July 1, 1989. One fundamental principle is reflected throughout all merger documents - the commitment to continuation of existing College philosophy, mission, and goals with normal review and enhancement as appropriate. However, with

significant and immediate improvement in institutional health and financial stability and with the prospect for new/expanded program opportunities to service future educational needs, particularly in the advanced technologies, Pennsylvania College of Technology today is able to begin full realization of the untapped potential and excellence of The Williamsport Area Community College of yesterday. The College is now an affiliate of The Pennsylvania State University; the College is not a Penn State branch campus or center. Today the College enjoys the benefits of a strengthened Board of Directors, appointed by Penn State and consisting predominately of strong educational leaders augmented with important political and community representation. The College has maintained its identity and reputation 25 years in the making, the College has maintained its proven and effective policies, procedures, staffing, legal counsel and contractual obligations while simultaneously ensuring future growth vitality, and opportunity through a very new solution to a very old problem.

SUMMARY OF SIGNIFICANT EVENTS IN THE HISTORY OF PENNSYLVANIA COLLEGE OF TECHNOLOGY

DATE		EVENT
-February 11, 1965	-	Plan for The Williamsport Area Community College officially approved by the state.
-September 7, 1965	-	First semester for the College began.
-1965-1973	-	Dr. Kenneth E. Carl, President.
-1967	-	Additional industrial space acquired.
-1968	-	Creation of 28 community college districts - W.A.C.C. assigned 10 counties.
-1970	-	College accredited by Middle States Association.
-1970	-	New facility constructed: Automotive Technology.
-1971	-	New facility constructed: Earth Science.
-1972	-	Developmental Studies initiated.
-1973	-	Distinct Financial Aid Office function was established.

SUMMARY OF SIGNIFICANT EVENTS IN THE HISTORY OF
PENNSYLVANIA COLLEGE OF TECHNOLOGY (Continued)

DATE		EVENT
-1973	-	Resource Development begins as a College function.
-1974-1980	-	Dr. William H. Feddersen, President.
-1975	-	College reaccredited by Middle States Association.
-1975	-	Off-campus programs began by Center for Lifelong Education (Sullivan County and Canton High Schools)
-1976	-	Postsecondary Cooperative Education started with seven students.
-1976	-	Cross registration begun with Lycoming College.
-1977	-	Full-time position for Industrial/Business Program in Center for Lifelong Education provided.
-1977	-	Wilderness Adventure began by Center for Lifelong Education to take advantage of natural recreational environment of area.
-1978	-	COPing program initiated (College Opportunity Program).
-1979	-	Cooperative Education became a College wide option.
-1980	-	New facilities constructed: Learning Resources Center, Building Technologies, and Metal Trades.
-1980	-	Outreach began by Center for Lifelong Education targeted at special populations.
-1981	-	Dr. Robert L. Breuder, President.

SUMMARY OF SIGNIFICANT EVENTS IN THE HISTORY OF
PENNSYLVANIA COLLEGE OF TECHNOLOGY (continued)

DATE		EVENT
-1982	-	Williamsport Area Community College Foundation created.
-1982	-	1000th student placed in Cooperative Education. Student earnings topped one million dollars.
-1982	-	Complete acquisition of land at main campus designed under Facilities and Site Master Plan.
-1982	-	Educational Research, Planning and Evaluation function created.
-1983	-	North Campus begins first semester.
-1984	-	New Lifelong Education Center occupied.
-1984	-	Reaffirmation of College accreditation by the Middle States Association.
-1985	-	City of Williamsport becomes sole sponsor of the College.
-1985	-	Ground broken for new 152,000 square foot Advanced Technology and Health Science Center.
-1986	-	Development and implementation of new financial support arrangements with municipalities, business and industries, and individual supporters of College to offset tuition costs for non-sponsored students.
-1986	-	Implementation of College-wide Rolm/IBM Information Network System.
-1986	-	Completion of student designed and constructed Professional Development Center.

SUMMARY OF SIGNIFICANT EVENTS IN THE HISTORY OF
PENNSYLVANIA COLLEGE OF TECHNOLOGY (continued)

DATE		EVENT
-1987	-	Opening of The Advanced Technology and Health Sciences Center.
-1987	-	The Lock Haven University Center at Williamsport Area Community College established as first Pennsylvania university center housed on a community college campus.
-1987	-	Full implementation of College-wide Internal Governance System.
-1988	-	Formal discussions commence regarding the College becoming a subsidiary corporation of The Corporation for Penn State.
-1988	-	National Science Foundation (NSF) Planning Grant awarded to College to develop a proposal to become the first community college based NSF-sponsored Technical Transfer Center in the nation.
-1988	-	A three-year partnership between the College, Penn State University, and Susquehanna Economic Development Association - Council of Governments established one of five state funded Industrial Resource Centers at the College.
-1989	-	On July 1, House Bill No. 1086 created Pennsylvania College of Technology as an affiliate of The Pennsylvania State University providing for the College to assume the functions of The Williamsport Area Community College.
-1990	-	College's first municipal bond issue in amount of $32 million dollars to fund Stage IV building program (with concurrent completion of building specification for new Aviation Center, new Campus Center, acquisition/restoration of Capitol Theatre).

SUMMARY OF SIGNIFICANT EVENTS IN THE HISTORY OF
PENNSYLVANIA COLLEGE OF TECHNOLOGY (Continued)

DATE		EVENT
-1990	-	Five year Title III grant ($2 million dollars) awarded to College to develop student-centered, individualized instruction approach using computerized technology-based instruction systems.
-1990	-	Initiated extensive foundation work for developing first Penn College baccalaureate degrees.
-1990	-	Technology Transfer Center, with support of National Science Foundation grant, under full operation.
-1990	-	Completion of Penn College Retreat Center at Morgan Valley.
-1991	-	Ground broken for three major building projects: Lumley Aviation Center, Bush Student Center, and Community Arts Center (addition to/restoration of Capitol Theatre).
-1991	-	Final design of first Baccalaureate programs to begin Fall 1992: Construction Management, Dental Hygiene, and Manufacturing Engineering Technologies.
-1992	-	Fall enrollment at record 4,296 FTEs; sixth consecutive year of FTE enrollment growth (51% cumulative increase since 1987). Total student headcount (full and part-time) at 4,942 (44% cumulative increase since 1987).
-1992	-	Sixty-three students initially enrolled in first four-year bachelor of science degree programs (Fall 1992). Additional four-year programs being developed in Transportation Management, Electronics Engineering Technology, Natural Resources Management, Business and Computer Technologies.

SUMMARY OF SIGNIFICANT EVENTS IN THE HISTORY OF
PENNSYLVANIA COLLEGE OF TECHNOLOGY (Continued)

DATE		EVENT
-1992	-	Unconditional Middle States Accreditation reaffirmed. Findings of Middle States' visitation team included: a) College's self-study honest and thorough, b) Staff are first rate, c) Students are serious about their work, d) Physical plant enviable, e) Finances and fiscal management are healthy, f) Planning process comprehensive and sound.
-1992	-	Fifty-five member Tech Prep Consortium implemented through Penn College's Technology Transfer Center providing sequential technical preparation combining at least final two years of high school with two years of postsecondary education (2 + 2). Supported through the College by a 3-year, $1.1 million federal grant (Carl Perkins Act).
-1993	-	The three major construction projects comprising the Stage IV Building Plan were completed in 1993. In January, the Kathryn W. Lumley Aviation Center housed the first students at its location at the Williamsport-Lycoming County Airport in Montoursville. In May 1993, the dedication was held for the Community Arts Center, a combination renovation, restoration and new construction project in downtown Williamsport. In August, students returned for the Fall semester to the new Alvin C. Bush Campus Center, housing student development, recreation, and academic space.

ORGANIZATION AND ADMINISTRATION OF THE COLLEGE

In order to pursue its philosophy and mission, to strive toward its goals and to accomplish its objectives, the College is organized into five major functional areas: Administration, Academic Affairs, Student Affairs, Employee and Community Relations, General Services. These five areas, plus two major support areas (Development; College Services), comprise the top level administration of the College. Each area is headed by a vice-president or dean reporting directly to the College president.

The College's organizational structure is graphically displayed in Charts I-1 through I-8. A comprehensive configuration of the College's organization is presented in the first chart. Each succeeding chart details the Office of the President and the five functional areas respectively.

INTERNAL GOVERNANCE SYSTEM

Responding to a College-identified objective contained within its Long Range Plan, in 1984, the Middle States Association recommended the development of a representative College body to coordinate the initiation, review, and recommendation of policies and procedures to the President. Following the year-long (1985-86) planning, review, assessment and discussion by the Governance Steering Committee, a recommended Governance System and associated By-laws were approved in July, 1986. The Internal Governance System provides a broad-based opportunity for input and participation in the College governance process from all internal segments of the College community, through elected and designated group representatives to a College Council and related Council Committees. The College Governance System replaces the former system of College-wide Committees.

Participants of the Internal Governance System examine, discuss, and make recommendations regarding the general areas of academic issues, student affairs, human resources and personnel matters, finance, facilities, and long range planning all within the limitation established by contractual agreements and establish legal authority. Six Council Committees focus upon curriculum, academic affairs, student affairs, human resources and personnel matters, long range planning, and facilities.

Listed below are the primary objectives and responsibilities of the governance umbrella structure known as College Council. In addition, the general objectives and responsibilities of the six existing Council Committees are listed along with the specific functions of each committee. For a complete discussion of governance philosophy, membership, organization and operation please refer to the College document titled Governance System By-Laws (1991).

I. THE COLLEGE COUNCIL: OBJECTIVES AND RESPONSIBILITIES

* To recommend establishment, deletion, number, functions, and composition of College Council Committees and oversee the operation of these Committees.

* To recommend establishment, deletion, number, functions, and composition of College Council ad-hoc Committees at Council's discretion or upon request from the College President. Council ad-hoc Committees will deal with issues of broad institutional impact germane to the purpose of the Governance System.

* To receive, review, evaluate, and act upon the reports, proposals, and recommendations from College Council Committees, as appropriate.

* To recommend acceptance, rejection, or modification of reports, proposals, and recommendations to the College President.

* To study and make recommendations regarding an issue germane to the Governance System which is not assigned to and/or under consideration by a Council Committee.

* To respond to requests from the President for Council to study and make recommendations regarding a stated issue or concern.

* To review and respond, as appropriate, to decisions made by the President or Board of Directors when those decisions are germane to the responsibilities and concerns of the Governance System.

* To develop appropriate communication mechanisms and to regularly communicate issues, status, and disposition of reports, proposals, and recommendations to the College community.

* To provide for the annual Governance election/designation process through its appointed ad-hoc Elections Committee.

* To evaluate the effectiveness of the College Council and the operation of all Council Committees under its jurisdiction.

II. THE COLLEGE COUNCIL COMMITTEES: GENERAL OBJECTIVES AND RESPONSIBILITIES

* To provide investigative and deliberative analysis of issues related to specific Committee responsibilities. As appropriate, this analysis will include the functions of: brainstorming, initiating, planning, advising, revising, coordinating, reviewing, evaluating, and communicating.

* To investigate proposed actions, initiate proposals where appropriate, and recommend actions to the College Council.

* To identify an annual listing of Committee priority issues during the first month of Committee operation to ensure a focus for Committee progress and accomplishment. Annual priority issues should relate to annual College objectives and initiatives. Upon Committee approval, this listing will be shared with the College Council for review and comment.

* To form temporary Committee subgroup task forces for specific issue analysis. These task forces may include resource individuals not members of the Committee.

* To examine and develop appropriate processes for effective Committee functioning.

* To evaluate effectiveness of Committee analysis and recommendations.

III. COLLEGE COUNCIL COMMITTEES: FUNCTIONS

A. Curriculum Committee

* To review and make recommendations concerning new, revised, and to-be-deleted courses, programs, or curricular proposals.

* To ensure information regarding proposals is communicated to appropriate constituencies for new, revised, and to-be deleted courses, programs, or curriculums.

B. Academic Standards and Issues Committee

* To be innovative and to review and make recommendations in the following areas:

    a. instructional methodology and materials
    b. program evaluation
    c. core competencies/courses/credentials
    d. student retention/probation/termination
    e. academic standards

C. Student Affairs Committee

* To initiate, review/comment/advise, recommend/not recommend, follow, and evaluate aspects of student life, including housing, athletics, extra-curricular activities, student government, cultural events, commencement, and general student welfare.

* To review and evaluate the procedures for student due process and student grievances, making recommendations for change as appropriate.

* To review and assess the College's marketing plan and make recommendations for revisions.

* To review/comment/advise, recommend/not recommend, and evaluate the College's plans with regard to enrollment and new student recruitment.

* To review and make recommendations regarding institutional development and community relations particularly with respect to marketing and impact upon students.

* To make recommendations regarding alumni affairs.

D. Human Resources Committee

* To review policy on promotions and make recommendations or modification; to review and recommend actions on promotion applications.

* To review/modify/recommend policy on evaluation systems.

* To review/modify/recommend policy and actions on sabbaticals and sabbatical applications.

* To brainstorm ideas/activities for staff development and to review/advise/recommend staff development.

* To review/advise on non-faculty personnel policies, benefits, hiring procedures, etc.

* To review/advise on EEOC and Affirmative Action policies.

* To review/advise/recommend policies on part-time faculty and non-faculty.

E. Long Range Planning Committee

* To review and evaluate outcomes of existing plans (the College Long Range Plan).

* To assist in planning and recommend annual updates to the plan including annual objectives with priorities.

* To brainstorm and promote ideas that provide innovation and creativity in annually identified special topic areas.

* To recommend annual and long-term priorities (Academic Affairs, Student Affairs, and Human Resources with other areas added as included in the overall Governance Structure).

* To serve as a review group for the Director, Office of Strategic Planning and Research.

* To solicit input to the planning process by various means including interactions with Chairs of Council Committees.

* To communicate with the College community regarding planning and its outcomes.

F. Facilities Committee

* To review and make recommendations to College Council concerning adequacy of facilities, space allocation, equipment, and safety.

- To review and make recommendations to College Council concerning College plans for future physical plant (i.e., new construction, major renovations) and coordinate new growth consistent with the College mission.

- To coordinate/review actions of subcommittees, review their proposals and make appropriate recommendations to College Council.

- To review and recommend to College Council policies and procedures for facilities use, scheduling, and fees.

SECTION III

STUDENTS: ENROLLMENTS AND PROFILES

SECTION III OVERVIEW:
STUDENT ENROLLMENTS AND PROFILES

Section III presents student data, sub-divided into six parts: application, enrollment and graduate data; enrollment demographics; academic preparation and grades; student attitudes, motivations and choices; occupational outlook; and continuing education.

Section III-A, Applications, Enrollments and Graduates, shows admissions data and program enrollments for Fall 1989-93, graduate and transfer data for 1988/89-1992/93, and enrollment projections for 1994/95-1998/99.

Table III-A1 displays a breakdown by program of admissions prospects, applications, acceptances, tuition deposits and enrollments. Total prospects have increased 46% since 1989. The proportion of prospects who actually enroll has declined from 24% in 1989 to 21% in 1993. Generally, 76% of those who pay their tuition deposit go on to enroll. However, the proportion of applicants who pay their tuition deposits has steadily declined from 81% in 1989 to 74% in 1993.

Table III-A2 presents full-time and part-time headcount enrollments by division and program. After increasing 19%, from 4156 in 1989 to 4942 in 1992, headcounts dropped 2.5% in 1993. The proportion of part-time students has slowly declined from 26% in 1989 to 24% in 1993.

Table III-A3 is a new table, presenting full-time and part-time credit hours, and full-time equivalent (FTE) enrollments by division and program. Similar to headcounts, total credits increased 19% from 1989 to 1992, then dropped 2.1% in 1993. FTEs increased by 23% from 1989 to 1992, then dropped 1.8% in 1993. Changes in credits have been below that of FTEs because average full-time credit loads have steadily dropped, from 15.4 in 1989 to 14.8 in 1993.

Table III-A4 shows the number of graduates by program and gender.

Table III-A5 displays the placement records of these graduates (*). Of the 4943 graduates surveyed from 1988/89-92/93, 4074 (82%) responded, with 78% of the respondents indicating either they were employed in a related field or continuing their education. 8% of the graduates were unemployed.

(*) The number of graduates presented in Table III-A3 differs from that presented in Table III-A4 due to students who petition late for graduation.

Table III-A6 presents a breakdown of institutions to which Penn College students, both graduates and non-returners, transfer. Of the 758 students known to have transferred from 1989 through 1993, nearly 90% stay in-state, 85% transfer to in-state four-year colleges, and nearly three-fourths transfer to in-state, public, four-year institutions. The most popular choices for transfer are Penn State (14%), Lock Haven (12%) and Bloomsburg (11%).

Table III-A7 shows FTE enrollment projections extended through 1998/99. Based on flat enrollment growth in existing programs, and the anticipated initiation of 16 new programs over the next three years, annualized enrollments are expected to reach 4500 FTEs by 1997/98.

****

Section III-B, Demographic Characteristics, presents headcount enrollments for Fall 1989-93 according to several student characteristics: age and gender; gender and full-time/part-time status; race and gender; and county of residence.

Table III-B1 displays male and female enrollments by age categories, as well as the average male and female student ages. The proportion of traditional college aged students (under 20) has steadily declined from 45% in 1989 to 35% in 1993. In contrast, the 20 to 29 year old age group has steadily grown, from 32% in 1989 to 41% in 1993.

Table III-B2 presents male and female enrollments by full-time and part-time status. Female enrollments have averaged about 44% since 1989. The proportion of part-time enrollments has decreased from 26% to 24%.

Table III-B3 shows enrollments by race and sex. Minority enrollments have nearly doubled since 1989, from 1.9% to 3.5% (79 to 168).

Table III-B4 displays enrollments by service area and county. Lycoming County enrollments have ranged from 35% to 40% of the total enrollment, while the proportion from the immediate ten-county area has generally been about 68%.

****

Section III-C, Academic Preparation and Grades, presents high school class ranks and placement test deficiencies for Fall 1989-1993, grade distributions, deans list and probation summaries for Fall 1989-1993, and retention and attrition data for 1986-1990 entering students.

Table III-C1 shows self-reported high school class ranks (top, middle or bottom third) of new degree-seeking students. After peaking at nearly 50% in 1990, the proportion of students ranked in the bottom third has declined to 44% in 1993. The proportion in the top third has consistently been about 22%.

Table III-C2 presents single and multiple student placement test deficiencies by division. Over half of all new students are consistently tested as deficient.

Table III-C3 displays final grade distributions by division. Grades have remained very consistent year to year. Typically, 30% of all grades issued are A's, 33% B's, 22% C's, 7% D's and 7% F's.

Table III-C4 presents the number of students placed on the Dean's List, on cumulative probation or on semester probation, by division and gender. The proportion of full-time students achieving the Dean's List has ranged from 17% to 19%. The proportion of all students on probation rose sharply in 1993: from 10% to 14% on cumulative probation, and from 14% to 18% on semester probation, both five-year highs.

Table III-C5 shows three-year graduation and retention rates by division and program for the first-time, full-time entering classes of Fall 1986 through 1990. Total retention has declined from 57% for the 1986 class to 47% for the 1990 class, while graduation rates have likewise declined from 56% to 44%.

Table III-C6 shows corresponding attrition rates by division and program for the first-time, full-time entering classes of 1986 through 1990. Attrition has increased from 43% for the 1986 class to 53% for the 1990 class.

****

Section III-D, Attitudes, Motivations and Choices, presents student reasons for going to college in general (1986-1992), for going to Penn College in particular, reasons for not enrolling or not returning (1989-1993), alternative activities (1988-1992), and alternative institutions (1989-1993).

Table III-D1 presents reasons full-time freshmen noted as very important in deciding to go college, for Fall 1986, 1989, 1990 and 1992. Getting a better education (88%, 4-year average) and making more money (83%) are the primary motivations for Penn College students.

Table III-D2 shows reasons degree-seeking students choose to enroll at Penn College. Course and program choice is the primary reason students choose Penn College, averaging about 53% from year to year. The proportion enrolling due to convenience has declined from 29% in 1989 to 26% in 1993.

Table III-D3 displays reasons leavers (non-returners) give for not re-enrolling and reasons non-matriculants give for choosing not to enroll at all. Enrolling at another institution and financial reasons are the primary factors causing these populations to not enroll at the College.

Table III-D4 presents the status of non-returners after leaving the College and alternatives most seriously considered by freshman who do enroll at the College. While employment is the primary alternative both for those who enroll and those who do not re-enroll, enrolling at another institution is being chosen as an alternative in increasing numbers.

Table III-D5 displays institutions that non-matriculants and leavers choose to attend rather than enrolling or re-enrolling at Penn College. Over 86% choose in-state schools, two-thirds of those choose four-year colleges, and nearly half choose an in-state, public, four-year institution. The primary alternative institutions include Penn State (14%), Lock Haven (10%) and Bloomsburg (7%).

****

Section III-E, Occupations With Growing Demand, presents occupational fields projected to show the fastest growth and the largest growth, from 1990 to 2005.

Table III-E1 shows the occupations projected to have the greatest growth rate between 1990 and 2005. Most of the fastest growing fields are health-care related: home health aides (92%), personal and home care aides (78%), medical assistants (74%), radiologic technologists and technicians (69%), and medical secretaries (68%). Other high growth jobs include systems analysts and computer scientists (79%), and human services workers (72%).

Table III-E2 shows the occupations projected to have the greatest volume of growth between 1990 and 2005. These include retail sales (887,000) and registered nurses (767,000).

****

Section III-F, Continuing Education, presents non-credit course offerings, enrollments and registrations by program area and location for Fall 1989-1993.

Table III-F1 displays total course sections offered, registrations, headcounts, and lecture and lab hours for Staff Development and Technology Transfer Center (TTC) courses. Staff Development registrations nearly quadrupled, from 393 in 1992 to 1569 in 1993. TTC registrations have steadily increased, from 416 in 1989 to 1061 in 1993.

Table III-F2 presents Staff Development and TTC registrations by program area and site (on-campus, designated site or client site). Business and Industrial Training registrations have nearly tripled, from 313 in 1989 to 929 in 1993. Weatherization registrations have ranged from 103 to 187.

(a) Beginning Spring semester 1990, students not accepted directly into their desired program, but enrolled in related supporting coursework are classified as "Pre-" program students within the division of their desired program (e.g., Pre-Nursing). Previously these students had been designated as Individual Studies students.
(b) Prior to 1990 Admissions data combined the Certificate and Degree Diesel programs.

(a) Beginning Spring semester 1990, students not accepted directly into their desired program, but enrolled in related supporting coursework are classified as "Pre-" program students within the division of their desired program (e.g., Pre-Nursing). Previously these students had been designated as Individual Studies students.

(a) Beginning Spring semester 1990, students not accepted directly into their desired program, but enrolled in related supporting coursework are classified as "Pre-" program students within the division of their desired program (e.g., Pre-Nursing). Previously these students had been designated as Individual Studies students.

(a) Percentages may not add up to 100 because graduates indicating they were unavailable for employment were not included.
(b) Includes both graduates employed directly in field of training and employed indirectly in field of training.
(c) Program data includes North Campus graduates. Division totals do not include North Campus graduates.

(a) Based on projected annual growth of: 6.0%
Programs which reach enrollment capacity are projected at that level.
New programs are taken to full implementation levels over two years.

(b) Spring 1994 FTEs are as of third week (2/22/94); May 1994 FTEs are projections.

(a) Retention refers to students who graduated or were still enrolled after three years, for Student Right-to-Know purposes, the graduation/transfer rate limits the definition of graduates to those who graduate in the program they entered, but also allows the inclusion of non-graduating students who are known to have transferred to a "higher level" program.

(a) For federal reporting purposes (Office of Civil Rights and the Student Right-to-Know Act) graduation, retention and attrition (drop-out) rates are based on cohorts of first-time, full-time, certificate or degree-seeking students who begin college in the Fall semester. Rates are determined according to the status of students in the cohort three years later; attrition refers to students who have not graduated nor are still enrolled after three years; OCR requires this group to be further defined based on whether these students are known to have transferred. Graduation and retention rates are defined in Table III-C5.

GLOSSARY

TABLES III-C5 AND III-C6:
GRADUATION, RETENTION AND ATTRITION RATE DEFINITIONS

For Federal reporting purposes (both the Office of Civil Rights (OCR) and the Student Right-to-Know Act), graduation, retention and attrition (drop-out) rates are based on cohorts of first-time, full-time, certificate or degree-seeking students who begin college in the Fall semester. Rates are determined according to the status of students in the cohort three years later (150% of the "normal" program length):

Attrition -	refers to students who have not graduated nor are still enrolled after three years;
Transfers -	refers to students who have not graduated and are no longer enrolled, but are known to have transferred to another institution (OCR);
Others -	refers to students who have not graduated, are no longer enrolled, and are not known to have transferred to another institution (OCR);
Retention -	refers to students who graduated (in any program) or were still enrolled after three years;
Graduates -	refers to students who graduated within three years, though not necessarily from the same program they entered;
Enrolled -	refers to students who did not graduate, but were still enrolled after three years;
Student - Right-to-Know Graduates	refers to students who graduated within three years from their program of entry;
Student - Right-to-Know Transfers	refers to students who did not graduate from their entry program, but are known to have transferred to a "higher level" program.

SECTION IV.

ALTERNATIVES

SECTION IV OVERVIEW: ALTERNATIVES

Section IV presents external data describing alternatives, or competitors for the College's students, specifically data related to alternative institutions for 1988-1992 and unemployment rates for 1989-1993.

Tables IV-A1 through IV-A3 present data concerning alternative institutions that potential students choose to attend rather than attending Penn College. These alternative colleges were identified as the 14 institutions showing the highest enrollment of the College's non-matriculants and leavers during the years 1989-1993 (see Table III-D5).

Table IV-A1 displays descriptive data about each alternative institution, including institution type, highest degree offering, location by city, county and state, and distance from Williamsport. Seven of the 14 alternative institutions are state (or state-related) universities and three are community colleges. Seven offer graduate degrees, while six are limited to associate degrees. Half are located within 100 miles of Williamsport.

Table IV-A2 shows headcounts, FTE enrollments and rate of growth in FTEs for the 14 alternative institutions compared to that of Penn College. The median FTE enrollment of the alternative institutions in Fall 1992 was 4220. Half of these institutions had higher FTE enrollments than Penn College in 1992, half lower. Other than Penn College, only three of these institutions experienced five straight years of growth from 1988 through 1992: Lock Haven, Luzerne County Community College, and Northampton County Area Community College.

Table IV-A3 presents average annual tuition rates, both in-state and out-of-state, and the rate of tuition increase for the 14 alternative institutions compared to that of Penn College. The median in-state tuition in 1992/93 was $3200. Only four of the 14 alternative institutions had higher tuition than Penn College, and only one of those was a public institution (Pitt). However, for data available from 1988/89 to 1992/93, the only college with a lower average annual rate of tuition increase than Penn College (7%) was Luzerne County Community College (4%). Other average tuition increases have ranged from 7% to 10%.

Table IV-A4 shows the state's total labor force and unemployment rates by county for 1989-1993. Locally, in Lycoming County and the immediate ten-county area, unemployment has consistently been around 7% since 1990. Statewide, unemployment increased from 4% in 1989 to 7% in 1992, before dropping to 6.3% in 1993. This parallels national trends, which increased from 5% in 1989 to 7% in 1992, before dropping to 6.4% in 1993.

(a) Prior to 1990/91 institutions reported tuition and fees based on their "typical" full-time load.
Beginning in 1990/91 institutions report tuition and fees based on a standard of 30 credits per year.
(b) Prior to 1989/90, In-State tuition reported is for non-sponsored state residents; sponsored tuition was roughly 1/2 that amount.
(c) Main Campus tuition rate.

SECTION V.

POTENTIAL STUDENT POOL

SECTION V OVERVIEW:
POTENTIAL STUDENT POOL

Section V presents external data documenting the College's potential market, in terms of high school enrollments, college enrollment and educational attainment rates, and overall population demographics.

Section V-A presents five years of historical data and two years of projected data tracking high school students from 10th grade enrollment through graduation and subsequent enrollment in college, for all Pennsylvania counties and for selected school districts that have had a history of providing substantial enrollments at Penn College.

Table V-A1 presents 1985-91 10th grade enrollments and subsequent graduates (actual 1988-92, projected 1993-94) and graduation rates (*). Overall, state graduation rates have begun to increase, from 84% in 1990, to 87% in 1992, matching that of the immediate ten-county area. Decreasing state high school enrollments (down an average 3.7% per year from 1985 through 1991) have resulted in a corresponding decline in the pool of high school graduates. However, this trend is expected to begin reversing, with increased high school enrollments by 1992 and increased graduates by 1995 (**).

Table V-A2 displays the actual number and rate of high school graduates who enroll in college the following Fall, from 1988-1992, and projected entering college students for 1993-1994. Statewide, college entry rates have steadily increased from 58% in 1988 to 67% in 1992. College entry rates in the immediate area, though somewhat lower, have shown a corresponding increase, from 49% to 56%.

Table V-A3 shows the actual number and rate of high school graduates who enroll at Penn College the following Fall, from 1988-1992, and projections for 1993-1994. Statewide, of all graduates immediately entering college, Penn College enrolled 1.1% of the population in 1992, down from a high of 1.3% in 1991. In the immediate area, this share also declined, from 16.6% in 1991 to 14.0% in 1992. The College shares of Lycoming County graduates, and Williamsport Area graduates have declined since 1989, from 29% and 38% respectively, to 22% and 24%. Next to Lycoming County, the counties which have on average had the highest rate of their college-bound graduates enter Penn College have been Sullivan (22%) and Clinton (17%) counties. Outside the immediate area, the counties with the highest rates include Cameron (9%), Columbia (7%), Fulton (7%), Mifflin (6%), Elk (6%), and Centre (5%).

* Note: In some cases, graduation rates compute to over 100%, due to students who transfer in after 10th grade and then graduate, and students who are held back and graduate late.

** PDE Education Statistics Projections to 1996-97.

Table V-B1 displays population counts and distributions from the 1980 and 1990 censuses, by county and race. Overall total populations remained very stable over the past decade, both locally and statewide. By race, the proportion of the minority populace increased from 5.1% to 8.1% in Williamsport, from 1.1% to 1.8% in the rest of Lycoming County, from 1.4% to 2.1% in the immediate 10-county area, and from 10.8% to 12.3% statewide.

Table V-B2 is a new table, presenting college enrollment and educational attainment rates by county, based on the 1990 census. As of Spring 1990, 6.5% of Pennsylvania's population was enrolled in college. Of those 25 years and older, 75% were high school graduates, and 18% had attained a bachelor's degree. These rates are somewhat lower in the immediate ten-county area: college enrollment - 5%; high school graduates 72%; bachelor's degree recipients - 12%.

(a) Projected 1993 and 1994 graduation rates are based on overall 5-year County/School District completion rates.
Projected graduates are calculated by multiplying 10th grade enrollments by projected graduation rates.

(a) Projected 1993 and 1994 graduates are based on overall 5-year County/School District completion rates (see Table V-A1).
Projected 1993 and 1994 college entry rates are based on 1992 actual entry rates and state projected increases:
1993 - 1.37% 1994 - 1.20%
Projected 1993 and 1994 graduates entering college are calculated by multiplying projected graduates by projected entry rates.

(a) Projected 1993 and 1994 college entrants are based on County/School District 10th grade enrollments, and projected graduation and college entry rates (see Tables V-A1 & A2).
Projected 1993 and 1994 Penn College entry rates are based on 1992 County/School District entry rates.
Projected 1993 and 1994 Penn College entrants are based on projected County/School District college entrants multiplied by overall 5-year County/School District Penn College entry rates.

SECTION VI.

PERSONNEL

SECTION VI OVERVIEW:
PERSONNEL

Section VI presents a statistical summary of the faculty and staff of Pennsylvania College of Technology for Fall 1989 through 1993.

Tables VI-1 and VI-2 illustrate the racial composition of College staff by occupational activity and employment status (VI-1 is full-time staff, VI-2 is part-time and temporary full-time). The proportion of full-time staff classified as faculty has slowly increased from 37.1% in 1988 to 38.4% in 1993. Minorities have consistently represented 2% to 3% of all full and part-time staff. Consistent with commitment in its Plan for Equal Opportunity, the College has extended outreach efforts to attract qualified minority applicants for positions at the faculty, administrative and professional levels.

Tables VI-3 and VI-4 illustrate the composition of College staff by gender, occupational activity and employment status (VI-3 is full-time, VI-4 is part-time and temporary full-time). Females represent 25% of all full-time faculty, up from 21% in 1989, and 43% of all full-time staff, up from 40% in 1989. Among part-time and temporary full-time employees, females represent 42% of the faculty, and 54% of all part-time/temporary staff, down from 62% in 1989.

Table VI-5 summarizes the educational background of College faculty, administrative and professional staff, by displaying the highest degree held. Of all faculty, nearly half (49%) hold graduate degrees. Overall, 53% of all full-time and part-time faculty, administrative and professional staff hold graduate degrees and 12% hold doctorates, up from 48% and 9% respectively in 1991.

Table VI-6 provides average full-time salaries by employee group and academic status. The average salary for all faculty has increased from $33,559 in 1989 to $42,595, an average annual increase of 7.6%. Administrative, Professional and Technical (APT) staff average salaries have risen from $30,826 to $37,131, an annual average of 5.6%. Classified and Service staff average salaries have increased from $15,814 to $18,860, an annual average of 6.7%.

Table VI-7 illustrates faculty distribution by division and academic status. Since 1989 the proportion of full-time faculty with the rank of full professor has consistently been about 10%, while associate professors represent 22% of the total. The proportion of assistant professors has increased from 30% in 1989 to 35%, while that of instructors has dropped from 40% to 34%.

SECTION VII.

FACILITIES, PHYSICAL PLANT AND EQUIPMENT

SECTION VII OVERVIEW:
FACILITIES, PHYSICAL PLANT AND EQUIPMENT

Section VII presents the College's current real estate holdings and facilities and a history of instructional equipment purchases.

Charts VII-1 and VII-2 present maps of the region and the main campus. Table VII-1 summarizes the College's land holdings, by year of acquisition and size.

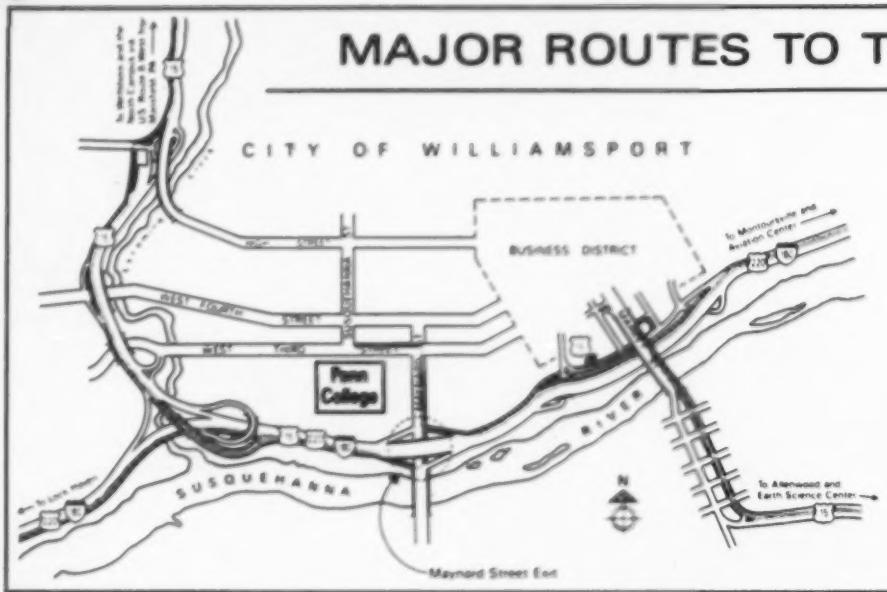
Tables VII-2 and VII-3 present the College facilities by year of construction, with estimated replacement cost, as well as a detailed analysis of the allocation of space by organizational area. Except for the North Campus facility which was acquired by donation in 1983, all buildings with a construction date prior to 1965 were acquired from the Williamsport Area School District.

Tables VII-4 and VII-5 describe classroom and lab space by building, with footage, rated capacity and maximum potential capacity.

Table VII-6 reflects the construction activity that has taken place at the College since 1965 as well as the sources of funding for the various projects. Such activity has been necessary to meet the increasing demands of our educational process and clearly demonstrates the commitment by the College to maintain a program of campus development which provides for appropriate facilities, attractive grounds and an environment which enhances learning, growth and development. Shifting program emphases will create demands to further update and replace facilities that are not educationally functional.

Table VII-7 summarizes instructional equipment purchases by academic cost center for 1988/89-1992/93. While matching funds received from the Commonwealth of Pennsylvania and from Federal/State Grants have been an integral source of funds to make such purchases, the magnitude of such funds in the future is uncertain. This uncertainty will create the need to use alternative funding sources to meet future equipment needs due to technological innovations.

MAJOR ROUTES TO THE CAMPUS



FROM THE NORTH: From U.S. Routes 14 and 15 South, follow U.S. Route 15 South to Williamsport and the Maynard Street Exit.

FROM THE SOUTH: Follow U.S. Route 15 North to Williamsport. Continue on 15 North to the Maynard Street Exit.

FROM THE EAST: Follow Interstate 80 to Interstate 180 (exit 31N). Follow Interstate 180 to Williamsport and the Maynard Street Exit.

FROM THE WEST: Follow Interstate 80 to Interstate 180 (exit 26). Follow Interstate 180 to Williamsport and the Maynard Street Exit.

From the Maynard Street exit, travel north on Maynard Street to the second traffic light. Turn left and proceed one-and-two-thirds blocks. The Academic Center will be on your right, the Learning Resources Center on your left.

Pennsylvania College of Technology, formerly The Williamsport Area Community College, is located in Williamsport, Pennsylvania—a city known internationally as the home of Little League Baseball. Williamsport is the county seat of Lycoming County, which supports a population of over 118,000. The city itself, with a population of over 33,000, offers the unique advantages of a city situated in a rural environment. The area surrounding the city is a virtual outdoor lovers' paradise, with ample opportunities for hunting, fishing, hiking, camping, backpacking and other outdoor activities just minutes from the downtown area.

The College's Main Campus is located at the west end of Williamsport, along West Third Street. The map inside depicts the facilities located on Main Campus. The College also includes three other campus locations: the North Campus near Wellsboro, the Aviation Center at the Williamsport-Lycoming County Airport in Montoursville, and the Earth Science Center in the Allenwood/Montgomery area. See the opposite panel for maps of these locations.

(a) Rated Student Capacity refers to the number of students who can be served based upon the number of desks and/or chairs presently in the room.

(b) Allowing a standard of 15 square feet per student for general classroom space, the data reported in this column indicates the maximum number of students that could be comfortably served in this space with provision of sufficient furninture.

(a) Rated Student Capacity refers to the number of students who can be served based on the number of desks and/or chairs presently in the room.

(b) Allowing a standard of 40 square feet per student for academic lab space and 100 square feet per student for technical lab space, the data reported in this column indicates the maximum number of students that could be comfortably served in this space with provision of sufficient furniture and equipment.

SECTION VIII.

FINANCES

SECTION VIII OVERVIEW:
FINANCES

Section VIII describes trends in costs, tuition and fees, financial aid and financial resources received and used by the College from 1988/89 through 1992/93.

Table VIII-1 illustrates educational costs and the average cost per FTE. The average cost per FTE for postsecondary credit students has increased an average of 7% annually from 1988/89 to 1992/93, from $4979 to $6432.

Table VIII-2 presents a breakdown of the tuition and fee structure of the College. Since 1989/90, tuition for a typical full-time student has increased from $3807 to $4896, an average 7% annual increase.

Table VIII-3 summarizes the types of financial aid awarded in terms of both the number of students served and the amounts awarded. The total amount of financial aid awarded has nearly doubled since 1988/89, from $7.9 million to $15.2 million, while the number of students receiving aid has increased 47%, in keeping with corresponding enrollment increases.

Tables VIII-4 through VIII-6 illustrate revenues and other additions by source and expenditures by function. Table VIII-4 shows that Grant and Contract revenue from Federal and State sources has been variable and future allocations are uncertain as governmental appropriations are also variable.

Table VIII-5 shows that revenue has more than doubled since 1988/89, primarily due to bond issue proceeds, which accounted for 44% of all revenue in 1992/93. State appropriations have increased 22% since 1988/89, while tuition and fee income has more than doubled.

Table VIII-6 summarizes the use of the College's resources by function. Total educational and general expenditures have increased 53% since 1988/89.
